Explanations

You found a wget command.
wget is a Terminal command you run to download a page from the Internet. Here, it downloads content from News.
It uses these options:

- `--continue (-c)` resume getting a partially-downloaded file.
- `--background (-b)` go to background after startup.
- `--output-file (-O)` log messages to `/tmp/download.log`.
- `--spider (-S)` download URLs found in local or external `/tmp/download.txt`.
- `--quote (-q)` set external quote to 100%.

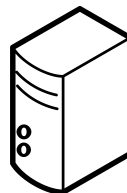

Demonstrations

```
<div id="sidebar">
  <a href="/speaker">
  </a>
</div>
```

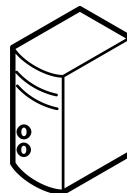

```
<table>
  <tr>
    <td>
    </td>
  </tr>
</table>
```
